

Six Sigma processes are a must to become a world class player.

Developing individuals within the organization leads to developing the entire organization.

Make a beginning today.

An Attractive Offer From

Trainers And Consultants In Quality Improvement

Listen to a free one-hour presentation [Get more details](#)

Green belt program for Corporations: For those companies, who are thinking of going the Six Sigma Way and have not taken the big jump; and those companies who want to start, but would like to start without making large investment and want to explore first.

This program will initiate 5 managers to the six-sigma philosophy and make them **Green Belts**; and at the same time they can complete 5 critical improvement projects - they in turn can coach 3 to 5 more individuals in the project team at the same time.

Thus this program will build a critical mass of 15 to 25 individuals who understand and are committed to six sigma. You can go on and build on this critical mass and continue.

This is a distance-learning program in Six Sigma Quality. There will be 20 well-researched modules, to be covered in 10 weeks. Modules in .pdf format will be sent to participants by e-mail.

All Queries and doubts will also be answered. The smarter participants will learn more.

You can assign the projects, which are important to your business. The course participants will lead these projects and complete them successfully with SigmaGuru guidance and support.

Green Belt certification will be given on completion of the project successfully and submission of the project report.

Fees – US\$2499 only (For 5 participants / 5 projects)

Send draft, payable to V M Bapat

About Faculty - see page 3

E-course on Six sigma and DOE

Content of 20 modules

Why Quality?

What Is Quality?

-Variety And Variations

-Special and common causes of variation

Proof of the need

Importance Of Quality

-Quality and Productivity / Lower Costs/ Best Insurance For Survival

Taguchi Loss Function

4 Important Quality Parameters

Average / Sigma / Cp / Cpk

Stages in quality journey to Six-sigma

Why training?

Product and process control

Case Studies Of Improvement

– Ceramic Company / Gear Manufacturer / Work smarter - use Statistics

+ Many more

In one MNC, **Rs 4.5 Millions / year** were saved within 3 months.
In another case, the saving was **Rs1.5 Millions / year** within 7 days.

Tools Of Quality Improvement

-Why DOE

7 Tools Of Shainin's Design Of Experiments

Multivari
Component Search
Paired Comparison
Variables Search
Full Factorials
B Vs C
Scatter Plots

How To Use The Tools

How To Maintain Quality Level

- Positrol / Precontrol / ISO

Methodology Of Implementation Of Quality Improvement Process

How to achieve success? And Achieve World Class Quality

Leadership / Project selection / QFD / MEOST / Teamwork
